Brandon Elmore

White Oak, PA | 302-747-8733 | blamblam9@gmail.com | GitHub Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Full Stack Software Engineer with over 4 years of experience designing, building, and scaling enterprise software solutions. Proven track record of leveraging data-driven methodologies, predictive algorithms, and responsive system design to optimize product features, reduce infrastructure latency, and drive seamless cross-functional execution.

SKILLS

- **Languages:** C++, Java, Python, Swift, SQL, JavaScript, TypeScript
- **Web & Systems:** HTML5, CSS3, Django, Bootstrap, AWS, Docker, Firebase
- **Data & Tools:** MongoDB, MySQL, Git, PowerShell, Xcode
- **Core Competencies:** Full Stack Development, Predictive Autoscaling, A/B Testing, Systems Design, NLU Data Pipelines

EXPERIENCE

Google — Full-Stack Software Engineer

Jun 2022 – Aug 2026

- **Expanded Global NLU Pipelines:** Scaled natural language understanding (NLU) pipelines for shopping intents from 5 to 31 international locales, expanding product reach to 10M+ daily active users in close collaboration with product managers and research teams.
- **Engineered High-Throughput Architecture:** Architected Java backend data pipelines and TypeScript/React UI enhancements for Autobuy product cards in partnership with UX designers, processing 500k+ daily notifications via CI/CD pipelines.
- **Drove Data-Informed UX & A/B Testing:** Spearheaded A/B testing initiatives during cross-functional Agile ceremonies to evaluate new shopping intent selector chips, achieving a 5% increase in Deals journeys.
- **Automated Compliance Testing Frameworks:** Implemented an automated release scheduling system with integrated automated testing frameworks, guaranteeing 100% adherence to EU regulatory standards across all feature launches.
- **Optimized AI Shopping Recommendations:** Partnered with product managers to design AI prompts for AI mode (AIM), enabling intent detection and high-volume lookups to surface complementary product recommendations.

Amazon (EC2) - Software Engineer Intern

May 2021 – Aug 2021

- **Reduced Infrastructure Latency by 20%:** Designed and deployed a proactive autoscaling algorithm on AWS EC2, cutting server provisioning latency by 20% during high-volume traffic surges.
- **Maintained 99.99% Availability:** Mitigated high-latency buffer times and sustained 99.99% enterprise system availability for major partners handling over 1M concurrent requests during peak events.
- **Led Technical Reviews & Adoption:** Conducted in-depth data analysis and facilitated technical

code reviews, partnering with cross-functional engineering leads to gain approval for production deployment.

Delaware State University — Computer Science Tutor & Teaching Assistant

Jan 2019 – May 2022

- **Data Structures Instruction:** Facilitated small-group study sessions and provided one-on-one instruction in Data Structures.
- **CS Foundations & Mentorship:** Guided students through foundational Computer Science concepts and provided ongoing peer mentorship.
- **Adaptive Instruction & Virtual Mentorship:** Transitioned tutoring operations seamlessly across in-person, remote lockdown, and hybrid environments, leveraging virtual collaboration tools (e.g., Zoom, Discord) to maintain uninterrupted academic support and peer mentorship.

PROJECTS

Personal Portfolio/Blog — Independent Project

Aug 2026 – Present

- **Accelerated Generation Speed by 40%:** Streamlined automated document generation pipelines using JavaScript and local LLM APIs, reducing generation latency by 40% for dynamic portfolio updates.
- **Established Automated Testing & CI/CD:** Built full-stack post-management features with React and PostgreSQL, integrating GitHub Actions CI/CD workflows and automated testing frameworks.
- **Static Site Architecture:** Engineered a responsive modern personal portfolio hosted on GitHub Pages using HTML5, CSS3, and JavaScript to showcase software projects and technical writing.
- **Responsive Design & Performance:** Optimized UI layout and styles with custom CSS3 flexbox and grid components, ensuring seamless cross-device compatibility and low page load times.

EDUCATION & CERTIFICATIONS

Delaware State University — Bachelor of Science in Computer Science

May 2022

- **Honors:** Dean's List (2020, 2021)
- **Certifications:** CodePath.org iOS Development Certificate – *Honors* (Spring 2020)
