Magnolia, DE

Education

Delaware State University

3.22 GPA

Computer Science, B.S.

Class of 2022

Skills

Languages Python, Java, Swift

Technologies XCode, Git

Courses Data Structures, iOS development, Operating Systems

Experience

Delaware State University

Aug. 2019 – Present

Computer Science Tutor

Dover, DE

- Provided tutoring to students taking classes centered around Python, Java, data structures and algorithms.
- Developed weekly coding challenges for students to build their skills and earn extra credit points.
- Served as a teaching assistant two computer programming courses.
- Assisted students with their robotic car labs meant to teach them the fundamentals of Python.

Amazon

May.2021 – Aug 2021

EC2 Team Member - Intern

Seattle, WA

- Worked on a project aimed at improving the Autoscaling algorithm.
- Worked on optimizing existing implementation
- Collaborated with the other members of my team to optimize and design new implementation

Projects

HackUMBC

Sep. 2019

- Created an AI that learned how to play pong using a deep q learning algorithm.
- Utilized Pygame to create a graphical user interface for the pong game.

Dragon Hacks

Feb. 2020

- Created an app to allow resumes and cover letters to be sent to recruiters faster and more efficiently
- Allowed the files could be shared via email or in the app.
- Incorporated parse to hold user data for online backups and user login.

Leadership & Community Involvement

Delaware State University Computer Science Club

Apr. 2019 – Present

Member & Peer Mentor

- Helped to plan an organize events being held by the CS Club
- Served as a mentor for incoming students in order to help them become acclimated with the university overall as well as with our individual program.
